

HSA Transition Notice

Dear ABB Enterprise Software Inc. employee,

Effective January 1, 2020, you will be under the new ABB Enterprise Software Inc. (ABBES) group with DataPath Administrative Services. Look for a registration email in your inbox during the first week of December.

If you have an open ABB HSA account with DataPath we will open your new account under ABBES. Please note, an opened account means that you have completed the HSA enrollment process, not just registered in Summit. If you have questions about how to open your account, please contact customer service.

If you qualify for an HSA and do not open your account by December 31, 2019, you will need to log into the new ABBES account and open it. DataPath Administrative Services will not open an account for you.

Your 2019 pre-tax contribution per pay period will automatically apply to your 2020 ABBES account. All 2019 Contribution changes will need to be made by December 18, 2019. Any changes made after this date will not transfer over to the new ABBES account.

- ❖ To change your 2019 contribution, you will need to log into your ABB account (datapathadmin.com/abb) and make the change before December 18, 2019
- ❖ For changes after December 18, you will need to log into your new ABB Enterprise Software Inc. account (datapathadmin.com/abbenterprisesoftware).
- ❖ Once you log in, go to Coverages and click small pencil 

Important Information on Balance Transfers:

DataPath Administrative Services will complete all balance transfers.

- While we expect minimal downtime, there may be a short blackout period beginning December 30 through December 31. During the blackout period, you may not have access to your funds. This is to allow transactions to post and to ensure the correct balances are being transferred.
- Investment changes will not be accepted during the blackout period.
- If you currently have investments, we will be transferring your portfolio during the blackout period.
- Log into your ABBES account on December 31, 2019. As soon as you see the funds are transferred, you can begin using your new Summit debit card.
- If you have any out of pocket expenses during this time, you can log into your account and request a withdrawal for reimbursement.

Thank you,
